

COST EFFECTIVE & FLEXIBLE PAYMENTS PLATFORM FOR LEGAL SERVICES

Accept Payments In-Person, Online & On the Go

Keeping up with client demands while growing your legal practice can be challenging. Accepting payments wherever your clients are doesn't need to be.¹

With Converge, you can process payments from your clients quickly and securely, whether in-person, online or on the go. And we can help you manage it all in one place, easily, securely and cost effectively.

With Converge you can accept a full range of payment options, including credit cards, debit cards, electronic gift cards, electronic checks and now mobile wallets² like Apple Pay™ and Google Wallet™. You can even handle recurring and installment payments.

You'll also be ready for the transition to the EMV (Europay, MasterCard® and Visa®) global payment standard and liability shift with our EMV-capable devices.

DESIGNED FOR TODAY'S BUSINESS

- Processes a full array of payment types from your office, through your website or on the go.
- Available security technologies help keep data safe throughout the payment process.
- Minimizes stored data liability and reduces your compliance efforts.
- Supports legal firms of any size in one or multiple environments.

● LET'S TALK:

¹Payments accepted in the US only. ²Your mobile carrier may charge access fees depending upon your individual plan. Web access is needed to use Mobile App. Check with your carrier for specific fees and charges. Some mobile features may require additional online setup. Any fees for optional transactions will be identified during registration for these services and during their use.

COMPLETE HOSTED PAYMENT PLATFORM TO SUPPORT ALL OF YOUR TRANSACTIONS

E-COMMERCE AND MOBILE

From a payment taken from your own mobile device or PC to an e-commerce integration with your own payment webpage, we have you covered.

- Flexible e-commerce options whether you need a simple hosted payment page or a completely customized experience
- Allows for mobile payments on the go

SECURITY FOCUSED

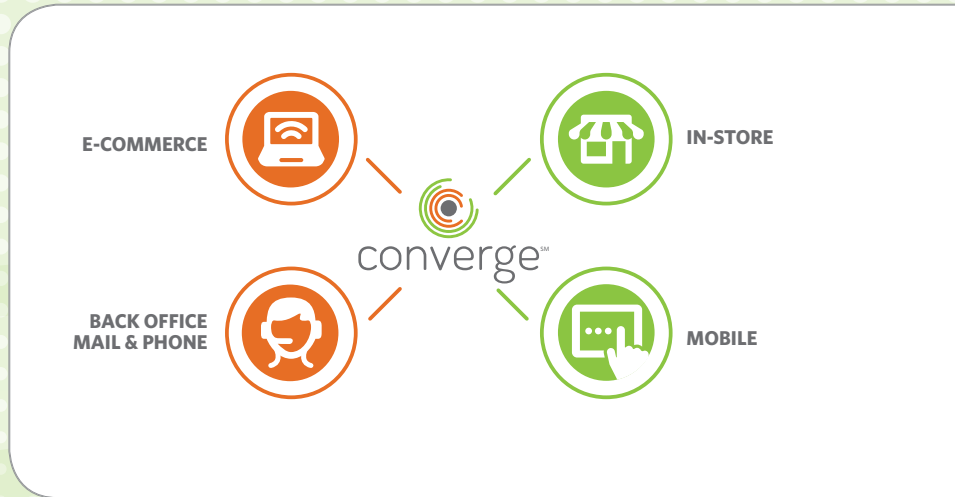

- Minimizes stored data liability and reduces your compliance efforts
- Supports the ever-evolving future of secure payments, including EMV-chip cards and Near Field Communication (NFC) contactless³
- Helps protect your customers' data throughout the payment process by utilizing the latest encryption technologies
- Allows you to securely store customer data and process payments using the available secure tokenization service
- Allows you to limit access by IP address to help keep out unauthorized users

VERSATILE & FLEXIBLE

- Accommodates up to 5,000 users and merchant numbers to easily scale up as your business needs grow and evolve
- Eliminates the need for software upgrades with the latest features made available to you automatically as part of the hosted service
- Supports a variety of peripherals, including signature capture PIN pads, check imagers and receipt printers as well as mobile card readers and printers
- Makes it easier for your international customers to do business with you when utilizing our available currency conversion solutions

EFFICIENT & COST-EFFECTIVE

- Processes transactions quickly when using a high-speed Internet connection
- Accessible from a web-browser using a secure login; no hardware specifications or separate network infrastructure needed
- Enables you to process authorizations at the time of sale, but submit for settlement later without re-keying the transaction data - ideal for mail/telephone orders or delayed delivery environments

³ Ingenico iSC250 is EMV-capable and NFC-enabled; it will be EMV-enabled in a future software release.
