

# VirtualMerchant Mobile

Built on Experience You Can Trust

Accept payments quickly and securely anywhere, anytime.

## Benefits at a Glance

- Supports anywhere-anytime processing for mobile environments including card-swiped or key-entered
- Accommodates an unlimited number of mobile devices to support businesses of any size
- Electronically capture cardholder signatures at the time of sale on all supported Apple and Android mobile devices

VirtualMerchant Mobile gives you the ability to accept payments anywhere you go using your smartphone or tablet. The App works with most Apple® and Android® mobile devices. You can easily key-enter payment information or choose to add a secure card reader to accept swiped transactions. Customers simply sign the screen and an electronic receipt is emailed to them.

VirtualMerchant Mobile is ideal for any size business needing to process transactions on the go. It can also be used at your location for payments during peak sales seasons, essentially creating a new payment terminal without the added expense. You can even capture and store Purchase Description, Invoice Number and Address details to provide detailed insights into payment activity.

## Simple & Secure

**Security** - In addition to encrypting card data at the time of swipe, all payment information is immediately sent to and stored in Elavon's secure, hosted environment to ensure security of cardholder data and to provide added protection for you and your customers.

**Connectivity** - Works with an array of mobile device types, to ensure freedom of choice. A selection of flexible card readers support swiped transactions through all supported mobile products.

**Flexibility** - Supports anywhere-anytime processing for mobile environments including card-swiped or key-entered transactions and is scalable to support an unlimited number of mobile devices for businesses of all sizes.

**Visibility** - Delivers more than just a mobile solution, also provides capabilities of our secure hosted virtual terminal, which includes detailed records of reporting for up to 12 months of transaction activity.

**Simplicity** - It's efficient and cost effective, allowing you to utilize your existing mobile device to enable mobile commerce and accept most card payments.

A mobile solution from an experienced, full-service payments provider.

## Accept Payments Anywhere, Anytime

## Card Reader for Swiped Transactions
